

# KONSTANTIN IVANOV

---

## SUMMARY

With nearly two years of professional experience as a Front-End developer, I find joy in coding, particularly in writing clean and well-structured code. I enjoy working with others, do well in team environments and am constantly motivated to improve my skills and expand my knowledge.

Currently working on a personal project using ReactJS, RESTAPI and Redux, so I can get more comfortable and also test my skills with that tech stack. Soon to be uploaded on my GitHub account.

---

## EXPERIENCE

**Front-End Developer, 05/2023 - Current**  
**Remicel Ltd. - Sofia, Bulgaria**

Responsibilities:

- Developing and updating Single Page Applications (SPAs) and custom websites by given design.
- Supporting already existing Software System written in React frontend and Python backend

**Front-End Developer, 10/2021 - 12/2022**  
**CloudSource Ltd. - Sofia, Bulgaria**

I was responsible for building and maintaining fully responsive sports betting websites based on client needs, using HTML/CSS and Javascript.

Also, participated in creating and styling custom E-commerce websites from scratch on Wordpress, using PHP.

**Intern in Operation Department, 05/2019 - 08/2019**  
**ProfiCredit - Sofia, Bulgaria**

Checked if client's data matches the one they have sent.  
Communicated with them when needed.

---
